

Torben-Matties Meyer

Physiotherapist and Osteopath

It is a Good Feeling to Help Others

Industry:

Medicine, Physiotherapy, Osteopathy

Location:

Germany, Lower Saxony, Hardeggen

Challenge:

Help people with afflictions. Train them and teach them about their medical condition in a clear and simple way.

Toolkit:

ConceptDraw
MindMap 7

Solution:

Use ConceptDraw MINDMAP to bring a structured and clear view of the complex information to patients and colleagues.

Benefits:

ConceptDraw MINDMAP provides a powerful way to organize, understand, and communicate complex information that helps people with afflictions improve their quality of life.

Torben-Matties Meyer - a professional physiotherapist and osteopath is from the city of Hardeggen in Lower Saxony, Germany.

His mission is to help people with afflictions by training and teaching them about their medical conditions.

He also willingly shares information and experiences with beginning physical and massage therapists.

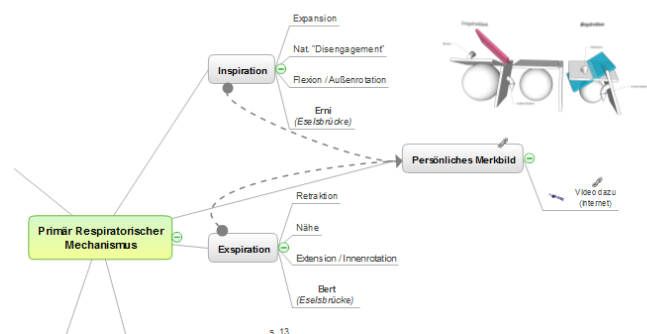

Torben-Matties first became familiar with mind mapping during his studentship. He used mind maps to provide students and teachers with a concise and simple method for organizing and structuring complex information.

"It is a good feeling to help others. I think this is the central idea of teaching,"

His way of sharing his work and the idea of working with Mind Maps gains him the respect of his classmates and other people.

"After the first class at the university ... many of my classmates came to me and thanked me for the mind maps.

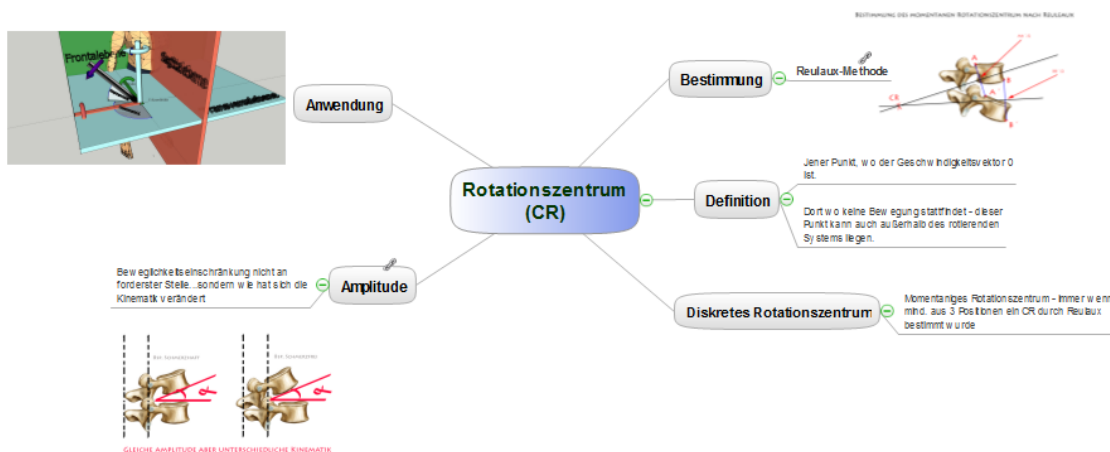

They didn't get it in the class, but after studying my mind map they got the nitty-gritty."

Eventually Torben-Matties realized that helping people with osteopathic afflictions by teaching and informing them - that's what he really wanted to do. "It is a good feeling to help others. I think this is the central idea of teaching," Torben-Matties Meyer says: "You truly understand the nitty-gritty only if you are able to explain the most complex concepts in the world in a clear and simple way."

Torben-Matties says that part of the challenge he faces "is to tell it in a way everyone can understand. Keep it short and simple. There is no other way to do it...you have to use a mind map... your brain is working in the same way a mind map works." He chose ConceptDraw MINDMAP to gain a clear, understandable visual representation of complex medical information.

"I am doing the main part with ConceptDraw MINDMAP. If I need a sketch in addition, there is no better kiss-like tool for doing sketches."

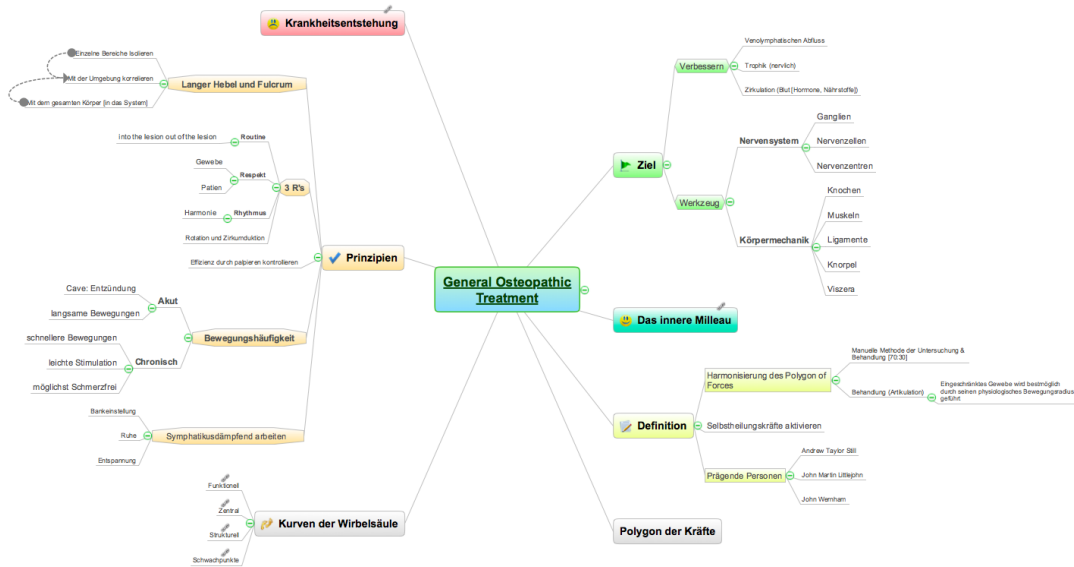

Torben-Matties considers that a lot of people are learning better with mind maps. "You are able to separate the unimportant from the important. And you can do it very quickly ... because ConceptDraw MINDMAP is very intuitive and clear"

"With ConceptDraw MINDMAP I am able to show that working with mind maps is more fun, more effective, and more beautiful than any other way of doing it. "

Torben-Matties also found ConceptDraw MINDMAP to be helpful in creating the educational videos that he posts on his site (www.verstehephysio.com) and on YouTube:

"I am doing the main part with ConceptDraw MINDMAP. If I need a sketch in addition, there is no better kiss-like tool for doing sketches than ConceptDraw PRO."

"Keep it short and simple. There is no other way to do it...you have to use a mind map...your brain is working in the same way a mind map works.."

"You are able to separate the unimportant from the important. And you can do it very quickly ... because ConceptDraw MINDMAP is very intuitive and clear"

Mind Mapping is a useful technique that helps one to remember information, as it holds information in a format that the human brain finds easy to recall and quick to review. It is important for mind map tools to be just as simple and intuitive as the idea of the mind mapping, itself.

"I think there are a lot of people who are thinking that a mind map is a bad thing that they have had to do in their class. But with ConceptDraw MINDMAP I am able to show that working with mind maps is more fun, more effective, and more beautiful than any other way of doing it."
